New! We have updated Always Online™ to a newer version. Update to the new version today.

Purge Cache

Clear cached files to force Cloudflare to fetch a fresh version of those files from your web server. You can purge files selectively or all at once.

Note: Purging the cache may temporarily degrade performance for your website and increase load on your origin.

Purge Everything

API

Help

Caching Level

Determine how much of your website's static content you want Cloudflare to cache. Increased caching can speed up page load time.

Browser Cache TTL

Determine the length of time Cloudflare instructs a visitor's browser to cache files. During this period, the browser loads the files from its local cache, speeding up page loads.
